

SELECT PREFERRED CLEANING PRODUCTS

FEATURE OVERVIEW

The intent of this feature is to **minimize potential health effects to occupants by selecting less hazardous products.**

Commercial cleaning products may contain ingredients that can degrade the indoor air quality and are suspected to be hazardous to human health. Some products may emit substances that irritate the nose, eyes, throat and lungs and can cause or trigger asthma attacks.

HIGHLIGHTS OF WHAT WE'VE DONE

THOROUGH PRODUCT REVIEW

Cleaning products are reviewed for compliance with environmental and personal safety standards prior to use in building.

SAFETY DATA SHEETS

Informational sheets are made available for building management and janitorial staff.

REVIEW SAFETY DATA

Safety data sheets are reviewed for known irritants to ensure they aren't included in the product.

BENEFITS

The provision of cleaning products that contain less hazardous ingredients may reduce the risk of respiratory and dermal symptoms.
